1. Purpose of the Document

The recast of the Markets in Financial Instruments Directive (Directive 2014/65/EU), commonly referred to as MiFID II, requires the International Private Bank Division of Deutsche Bank Luxembourg S.A. ("The Bank") to publish a report aiming at enabling the public and investors to evaluate the quality of an investment firm's execution practices and to identify the top five execution venues in terms of trading volumes where investment firms executed or transmitted client orders in the preceding year.

This document provides an assessment of quality of execution obtained on all venues and entity used by the firm. This information will provide you with a clear picture of the execution strategies and processes applied to assess the quality of execution obtained on those venues/entities. Please be informed that information is only published in relation to those asset classes executed by the Bank for their clients in 2021. Furthermore, please also be informed that this report relates to a period (calendar year 2021).

To learn more about the identity of the top five execution venues / execution entity, please consult the relevant documents provided per asset class on our website (<https://www.db.com/luxembourg/>).

Your client advisor is at your disposal in case of any further questions.

2. Equities - Shares & Depository Receipts

A. Best Execution Principles

When receiving, transmitting or executing client orders as well as buying or selling financial instruments within the context of Discretionary portfolio management services, the International Private Bank Division of Deutsche Bank Luxembourg S.A. ("The Bank") will take all sufficient steps to determine the best possible result primarily in terms of total consideration.

The "total consideration" is composed of the following:

- The price of the relevant financial instrument.
- The costs related to the execution.

However, in certain circumstances, for some instructions, instrument types or markets, execution factors such as speed, likelihood of execution and settlement, size and nature of the order, market impact and any other implicit transaction costs will be given precedence over the immediate price and cost consideration to ensure the best possible result for the client.

The Bank has chosen to apply the same best execution principles to professional and retail clients.

B. Execution Entity

In 2021, all Equity orders received by the Bank from retail and professional clients were transmitted to Deutsche Bank (Suisse) SA for execution. The table below applies to Retail and Professional clients.

| Class of Instrument | Equities - Shares & Depository Receipts | | | | |
|---|--|--|------------------------------|---------------------------------|-------------------------------|
| Notification if < 1 average trade per business day in the previous year | N | | | | |
| Top five execution entities ranked in terms of trading volumes (descending order) | Proportion of volume traded as a percentage of total in that class | Proportion of orders traded as a percentage of total in that class | Percentage of passive orders | Percentage of aggressive orders | Percentage of directed orders |
| Deutsche Bank (Suisse) SA (LEI: 5529900BXXPMXQTRE1V05) | 100% | 100% | N/A | N/A | 0% |

C. Best Execution Quality

The Bank monitors the effectiveness of its best execution arrangements in place with execution entities and venues and assesses their performance with regards to the best execution factors outlined in the Bank's Order Execution Policy on a quarterly basis at the minimum. This is performed by assessing the current execution entities and venues against other execution entities and venues offering the same financial instrument scope and level of service as the existing execution entities and venues.

Based on the monitoring activities performed, the Bank has no reason to consider the achieved execution quality as not sufficient to ensure the clients best interest on a consistent basis.

Therefore, no changes to the execution entity was made in 2021.

D. Information on Close Links, Conflicts of Interest, and Common Ownership

Deutsche Bank Luxembourg S.A. and Deutsche Bank (Suisse) are affiliates of Deutsche Bank AG.

C. Best Execution Quality

The Bank monitors the effectiveness of its best execution arrangements in place with execution entities and venues and assesses their performance with regards to the best execution factors outlined in the Bank's Order Execution Policy on a quarterly basis at the minimum.

For the execution entity used to execute secondary securitized derivatives, this is performed by assessing the current execution entities against other execution entities offering the same financial instrument scope and level of service as the existing execution entities.

Based on this assessment, no change of the execution entity was made in 2021.

For the execution venues used to execute primary securitized derivatives, Deutsche Bank group regularly reviews the list of approved issuers based on criteria such as credit ratings of various rating agency, credit default spreads, as well as internal ratings. In case of material deterioration of these ratings, issuers may be removed from this list. On the other hand, issuers showing improved credit ratings may be added to the list. Based on this assessment, the list of approved execution venues for primary securitized derivatives was amended in 2021.

12. Commodities Derivatives - Futures and options admitted to trading on a trading venue

A. Best Execution Principles

When receiving, transmitting or executing client orders as well as buying or selling financial instruments within the context of discretionary portfolio management services, the International Private Bank Division of Deutsche Bank Luxembourg S.A. ("The Bank") will take all sufficient steps to determine the best possible result primarily in terms of total consideration.

The "total consideration" is composed of the following:

- The price of the relevant financial instrument;
- The costs related to the execution.

However, in certain circumstances, for some instructions, instrument types or markets, execution factors such as speed, likelihood of execution and settlement, size and nature of the order, market impact and any other implicit transaction costs will be given precedence over the immediate price and cost consideration to ensure the best possible result for the client.

The Bank has chosen to apply the same best execution principles to professional and retail clients.

B. Execution Entity

In 2021, all Commodity Derivatives orders received by the Bank from professional clients involving futures and options were transmitted to Deutsche Bank AG for execution. The table below applies to Professional clients only.

| Class of Instrument | Commodities Derivatives - Futures and options admitted to trading on a trading venue | | | | |
|---|--|--|------------------------------|---------------------------------|-------------------------------|
| Notification if < 1 average trade per business day in the previous Year | Y | | | | |
